

**WHERE EVERY
GREAT BUILD
BEGINS.**

Product Spec Sheet

Solar ground mounts + Smart Steel Solutions + Warehousing

89x37x0.75 C-channels

Feature	Details	Specs
Weight	Lightweight, engineered for easy transportation and assembly.	1.07-1.69kg/m
Roof Pitch	Designed to accommodate angles between 15 and 30 degrees for optimal functionality.	15-30'
Size Options	Configurations available to support 4 to 16 solar panels.	4-16
Panel System	Modular design allows for easy customization and expansion based on user needs.	
Lifespan	Maintenance-free construction, offering years of reliable performance.	Galvanised material 15-20 year lifespan
Modularity	Fully serviceable components enable straightforward repairs and replacements.	
Material	Built from high-quality, galvanized steel for superior durability and resistance to corrosion.	
Transportability	Compact and lightweight design ensures ease of transportation, whether locally or for remote installations.	
Cost Efficiency	Affordable without compromising on quality, making it accessible for various budgets and applications.	

Key Features for solar applications

- Sustainability: Designed to maximize solar efficiency and durability.
- Versatility: Suitable for residential, agricultural, and industrial applications.
- Quick Installation: Modular components simplify and speed up the assembly process.

Optional Add-Ons for

- Extended warranties
- Additional structural customization
